

**Helping Families,
Strengthening Communities**

Hinds County Human Resource Agency
Project Head Start

Required Medical and Dental Screenings

All Head Start students are required to have current medical and dental screenings completed within 90 days of enrollment.

If your child has not received a medical or dental screening, Hinds County Human Resource Agency will provide health screenings to Head Start students at no cost to our Head Start parents.

To get all of your child's required health screenings completed before the 90-day deadline, please bring your child to the health screening scheduled for your child's Head Start center.
